DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Braid. Braid teaches an optical comparator having a splitter mirror (14) that makes partial penetration and reflection of an image, a mirror (15) that makes a total reflection of an image, a first light source (11) that illuminates a first pattern for a first image and a second light source (13) that illuminates a second pattern for a second image. Since the light source 11 is from a cathode ray tube it scans fields in an alternate manner, inherently resulting in an alternating signal between sources 11 and 13.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Braid.

Braid is cited for reasons of record against claim 1, but only teaches a first lens (16)

between the first pattern and the splitter mirror. It would have been obvious to utilize a second lens that is placed between the second pattern and the splitter mirror, since this is a function of the focal lengths of the display light sources.

Allowable Subject Matter

Claims 2, 3 and 5-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in the dependent claims which include the recited spacing configurations and additional lenses of the comparator structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
